

Double-click table headers, columns, or foreign keys to edit.  
Create multiple layouts (diagrams) with the same or different tables.  
Saving the model to file will save also the layouts.

## Main Layout

### Table post

* Pk	id	bigint
	created	timestamp
	updated	timestamp
*	description	varchar(1500)
*	filename	varchar(2048)
*	owner_id	bigint
	parent_post_id	bigint

#### Indexes

Pk	post_pkey	id
----	-----------	----

#### Foreign Keys

	post_parent_post_id_fkey ( parent_post_id )	ref post ( id )
	post_owner_id_fkey ( owner_id )	ref users ( id )

### Table user\_post\_likes

	liker_id	bigint
	owner_id	bigint
	post_id	bigint

#### Foreign Keys

	user_post_likes_post_id_fkey ( post_id )	ref post ( id )
	user_post_likes_liker_id_fkey ( liker_id )	ref users ( id )
	user_post_likes_owner_id_fkey ( owner_id )	ref users ( id )

### Table users

* Pk	id	bigint
	created	timestamp
	updated	timestamp
* Unq	username	varchar(50)
	parent_id	bigint

#### Indexes

Pk	users2_pkey	id
Unq	users2_username_key	username

#### Foreign Keys

	users2_parent_id_fkey ( parent_id )	ref users ( id )
--	-------------------------------------	------------------
