Double-click table headers, columns, or foreign keys to edit.
Create multiple layouts (diagrams) with the same or different tables.
Saving the model to file will save also the layouts.

Main Layout

Table post

* Pk	id	bigint
	created	timestamp
	updated	timestamp
*	description	varchar(1500)
*	filename	varchar(2048)
*	owner_id	bigint
	parent_post_id	bigint

Indexes

Pk	post_pkey	id

Foreign Keys

post_parent_post_id_fkey (parent_post_id) ref post (id)

post_owner_id_fkey (owner_id) ref users (id)

Table user_post_likes

liker_id	bigint
post_id	bigint

Foreign Keys

user_post_likes_post_id_fkey (post_id) ref post (id)

user_post_likes_liker_id_fkey (liker_id) ref users (id)

Table users

* Pk	id	bigint
	created	timestamp
	updated	timestamp
* Unq	username	varchar(50)
	parent_id	bigint

Indexes

Pk	users2_pkey	id
Unq	users2_username_key	username

Foreign Keys

users2_parent_id_fkey (parent_id) ref users (id)
